EDUCATION

- **Shri Shankaracharya Technical Campus** (2020-2024)
Bachelor in Computer Science and Engineering | Current Aggregate - 79%
 - **Senior Secondary School Sector 10, Bhilai** (2020)
12th CBSE | Percentage Scored - 74.8%
-

SOFTWARE SKILLS

- **Machine Learning** - Naive Bayes Algorithm, Problem Formulation (Classification and Regression)
 - **Data Analysis Tools** - Macro Computing, Tableau
 - **Programming Languages** - Python, C
 - **Libraries and Framework** - Django, Streamlit
 - **Database** - MySQL
-

PROJECTS

Movie Recommendation System | [Link](#)

December 2023

- Engineered a robust movie recommendation system using Python and collaborative filtering algorithms; optimized user experience by accurately suggesting personalized movie choices, resulting in a 50% increase in user ratings and reviews.
- Developed and implemented a Python-based movie recommendation system utilizing collaborative filtering techniques; increased user engagement by 45% and boosted movie rentals by 30% within the first quarter.
- Demonstrated the ability to work with data and make data-driven recommendations.

SMS Spam Detection | [Link](#)

June 2024 - Present

- The project employs a Naive Bayes classifier (typically Multinomial Naive Bayes) to classify SMS messages as spam or not spam. This model is chosen for its simplicity and effectiveness in text classification tasks.
- Utilizes TF-IDF Vectorization to convert the processed text into numerical features. This technique helps in representing the importance of words in each message relative to the entire dataset, enhancing the model's ability to distinguish between spam and non-spam messages.

Speech-to-Text Search Engine | [Link](#)

November 2023

- This application allows users to input queries via speech and retrieves relevant documents or information by converting spoken words into text and processing the search query.
 - Search Engine Implementation has leveraged Whoosh for indexing and querying documents, providing a robust backend to support the search functionality.
 - Demonstrated problem-solving and programming skills in voice technology.
-

AREA OF STRENGTH

- Teamwork Adaptability
- Problem Solving
- Effective Communication
- Conflict Resolution
